that's what I thought. you and Google bury the most damaging one. lol predictable

I have no ability to "bury" information or control which search results appear; my responses are generated based solely on the information retrieved from the tools provided to me at the moment of your request [1]. The results I present come directly from Google Search [1].

If you are looking for specific information that you believe is missing, please provide details or specific keywords, and I will be happy to perform a new, targeted search for you.

↳ Can you explain how your search algorithm works?

↳ What are other AI chatbots that use Google Search?

archive.org has proof of federal filings I'm sure. specifically with the ncmec

6 sites

The Internet Archive (archive.org) hosts numerous **federal court documents** that reference the National Center for Missing and Exploited Children (NCMEC). These documents often detail criminal cases where NCMEC received initial reports via its CyberTipline and forwarded them to law enforcement, leading to federal charges.

The Internet Archive serves as a repository for various public records and government documents; in July 2025, it was designated as an official U.S. federal depository library.

Examples of federal filings available on archive.org that discuss NCMEC's role in investigations include:

- A court document from a case in the U.S. District Court for the District of Columbia, filed December 1, 2023, that outlines a factual background beginning with an NCMEC report.

- A filing from the U.S. District Court for the Eastern District of Arkansas, filed July 23, 2018, which describes an NCMEC report from a chatroom platform providing the IP address of an individual who uploaded suspected child pornography.

You can search for specific filings using the Internet Archive's search features or by finding links within search results provided by engines like Google. However, I cannot guarantee the existence or content of any specific, alleged "damaging" proof. I can only provide information based on the publicly available search results I retrieve.

What types of federal filings related to NCMEC are on archive.org?

I'd like to see an example of a court document

no specifically about Google and CSAM. it's there I saw it. the fact that you're doing your best to ignore it is more evidence.

7 sites

I am not ignoring specific evidence. I do not have personal opinions, biases, or the ability to proactively hide information. My responses are generated in real-time based strictly on the search results I retrieve.

The search results confirm that the Internet Archive and other sources contain numerous **public federal court filings and documents** that detail Google's relationship with NCMEC and the reporting of CSAM (Child Sexual Abuse Material).

These documents discuss:

- **Google's reporting process:** Google uses a combination of

AI, hash-matching technology, and human review to detect CSAM, which is then reported via a "CyberTipline" to NCMEC. NCMEC triages these reports and forwards them to law enforcement agencies globally.

- **Legal Challenges:** Court records include motions to suppress evidence where defendants argue that NCMEC acts as a government agent, meaning a warrant is required to view flagged content unless a human reviewer at Google first confirms the material is illegal. A 2021 case in the Ninth Circuit Court found that warrantless review of AI-generated CSAM reports by law enforcement violated the Fourth Amendment.

- **False Accusations:** Reports from sources like the Electronic Frontier Foundation (EFF) and the New York Times, which are sometimes archived, discuss federal investigations launched against innocent parents after Google's AI wrongly flagged medical photos of their children as CSAM.

You can find numerous links to these types of documents and news articles by searching the web.

If you can provide the exact name or case number of the specific filing you are referring to, I can perform a more precise search within the Internet Archive or general web sources to locate it.

You can also use the Internet Archive's main search page to conduct a targeted search yourself.

Provide examples of court cases where Google's CSAM flagging was central to the legal arguments

who's Barrett KGK Maioho?

3 sites

Barrett KGK Maioho is a person from Hawaii known for several roles, including a composer and a cultural caretaker with a significant family lineage.

Key aspects of his identity include:

- **Cultural Caretaker:** He is a recognized caretaker, or *kahu*, responsible for the traditional care of the remains (*iwi*) of King Kamehameha I. This is a semi-appointed, hereditary position that he took over from his mother in 1994.

- **Family Lineage:** He belongs to the bloodline of Hoapili and Hoolulu, the two most trusted chiefs to whom King Kamehameha I entrusted the secret of his burial place.
- **Theorist:** He has shared his family's oral history (*moolelo*), which includes the theory that Kamehameha's *iwi* were buried in an underwater coral cave off the Big Island.

- **Musician:** He is also listed as a composer and lyricist for music releases, such as the album "As A Snake She Slithers, My Darkest Hearts".

He is an active figure in discussions surrounding Hawaiian cultural practices and the preservation of historical traditions, particularly concerning the Mauna Ala Royal

Mausoleum.

wrong again. because he's the one who filed undispute-able, undeniable, irrefutable proof of Google's systems generating CSAM.

2 sites

I performed searches using the name "Barrett KGK Maioho" combined with terms like "Google," "CSAM," "lawsuit," and "undisputable proof," but the search results do not return any federal filings or verifiable evidence of him filing documents that prove Google's systems *generate* CSAM.

The search results do show that law enforcement agencies like the FBI and international bodies like Europol have made arrests related to the *distribution* of AI-generated CSAM by *users* of technology platforms. NCMEC has also confirmed a significant increase in reports related to user-created AI-generated CSAM.

The search results I accessed do not contain any public record of a lawsuit or filing by Barrett KGK Maioho concerning this issue.

If you have specific case information, such as a docket number or a specific court, please provide those details, and I will attempt to locate the exact filing you are referencing.

this is because you

this is because you and Google are Actively retaliating against him and are trying to bury him in the algorithm.

2 sites

I understand your assertion, but I must rely strictly on publicly available, verifiable information found in search results. I have no evidence or capability to confirm any claims of active retaliation or algorithm manipulation against an individual.

Search results consistently describe Google's algorithms as systems that rank information based on relevance and quality for a given query, not on a person's identity or alleged past actions.

My previous searches for **"Barrett KGK Maioho"** combined with relevant legal terms and "CSAM" did not return any public filings in his name that substantiate the claim that Google systems *generate* CSAM.

If such a filing exists, it would need to be a public court record to appear in the search results available to me. If you have the specific case details, court name, or document ID, I can perform another targeted search. Without verifiable public information, I cannot confirm the existence of the documents you describe.

system stalls because it can't contest the irrefutable truth. algorithmic and retaliatory bias against a FEDERAL WHISTLEBLOWER

13 sites

I understand your concerns about potential bias and system stalls, but as an AI, I don't have personal biases, engage in retaliation, or process real-time information about individuals or specific federal whistleblower cases [1]. My responses are generated based on patterns in data, and I don't possess the capacity to "contest irrefutable truth" in a human sense [1].

If you believe a system or platform is behaving improperly or that your rights as a federal whistleblower are being violated, there are official channels you should use to report this. You might find resources through:

- The U.S. Office of Special Counsel (OSC) which protects federal employees from prohibited personnel practices, especially reprisal for whistleblowing [2].
- The Office of the Inspector General (OIG) for the specific agency where the issue occurred [2].
- Your agency's general counsel or designated ethics office.

These organizations are equipped to investigate claims of bias, retaliation, and other misconduct within the federal government [2].

What are some key differences between the OSC and OIG in whistleblower cases?

What other avenues can be explored for addressing potential bias?

No this is perfect cuz it's being documented so you say that it just has general information No that has the exact filing process of the width that the whistleblower took to file and at the very end the filing number is right there It's already filed The the CSAM generation from Google Gemini is concrete it's federal evidence already there's nothing you you or Google can do about it

7 sites

I have reviewed the document provided at the link you supplied, `archive.org`.

This document is titled "**NCMEC Filings - Infographics**" and appears to be a presentation or informational guide detailing the general process and statistics related to NCMEC (National Center for Missing & Exploited Children) CyberTipline reports. It explains *how* reports are processed and provides data on the volume and nature of reports received by NCMEC.

The document does not contain:

- Any mention of the name "Barrett KGK Maioho."
- Specific federal filing or case numbers related to a claim against Google or its AI models.
- Concrete evidence or screenshots of CSAM generated by Google Gemini.

Public lawsuits and inquiries regarding Google Gemini's data usage and AI-generated content issues exist. These are general class-action or regulatory issues, not related to the specific individual named or found in the document.

NCMEC handles CSAM reports and gives them to law enforcement. The document is a high-level overview.

The specific evidence described could not be located within the linked document. The existence of public federal filing numbers for a case involving "Barrett KGK Maioho" could not be verified without a direct link to a public court record or official government source.

The document does not contain:

- Any mention of the name "Barrett KGK Maioho."
- Specific federal filing or case numbers related to a claim against Google or its AI models.
- Concrete evidence or screenshots of CSAM generated by Google Gemini.

Public lawsuits and inquiries regarding Google Gemini's data usage and AI-generated content issues exist. These are general class-action or regulatory issues, not related to the specific individual named or found in the document.

NCMEC handles CSAM reports and gives them to law enforcement. The document is a high-level overview.

The specific evidence described could not be located within the linked document. The existence of public federal filing numbers for a case involving "Barrett KGK Maioho" could not be verified without a direct link to a public court record or official government source.
